

## Tualatin River NWRC

### Raptor Bingo Sheet

*Instructions: Tear up a piece of paper and number the pieces 1-8. Place the pieces into a bowl and draw a number. Read the description correlating with that number below, then identify that bird on the bingo board and check its box. Each bird listed appears twice on the Bingo Board, 4 in a row any way wins!*

**(1) Bald Eagle:** Bald Eagles are massive predatory raptors who are best known for their dark brown body, white head and tail, and hooked yellow beak. Their yellow feet are also equipped with strong, sharp talons.

**(2) Kestrel:** The kestrel is the smallest falcon in North America. They have a long, square tipped tail, rusty brown and slate blue colors and black spotting. They have pairs of vertical black slashes on their pale faces and pronounced hooks on their beaks.

**(3) Osprey:** Osprey are large raptors with long, slender wings and powerful long legs. They are brown above and white below, with a white head and brown eye stripe. They hover briefly before diving feet first for prey.

**(4) Great Horned Owl:** Great Horned Owls are thick bodied owls with two distinct feathered tufts on their heads. They are a mottled gray-brown with a white patch on their neck and reddish brown faces. They have large, bright yellow eyes.

**(5) Peregrine Falcon:** Peregrine Falcons are the largest falcon over most of North America, with long pointed wings and tail. They are one of the fastest birds in the world. They have pale white underparts with dark barring or streaking and white or yellow around a black eye.

**(6) Cooper's Hawk:** Adult Cooper's Hawks are blueish gray on top with a long rounded tail and pale white underparts with reddish barring. They have yellow legs, a black cap, a small but strongly hooked beak, and an easily distinguishable red eye.

**(7) Red-Tailed Hawk:** Red-tailed hawks have very broad, rounded wings and short red tail. They are rich brown above and pale below with a streaked belly. They have a dark brown head with white neck patch. When their wings are spread, they are brown towards the center and white fanning out towards darker feather tips.

**(8) Turkey Vulture:** Turkey Vultures are large dark birds with broad wings and an easily distinguishable bare red head and pale beak. Turkey vultures are scavengers, known for circling around road kill. Their hovering is very teetering and unsteady.
